PROFESSIONAL SUMMARY

B.Tech student in Artificial Intelligence and Machine Learning with applied experience building OCR-based automation, conversational AI systems, and production-style web interfaces. Comfortable across the stack – from integrating ML/LLM APIs and designing data-driven features to shipping responsive React frontends. Looking to apply strong fundamentals in problem-solving and software engineering practice to a team building real products at scale.

EDUCATION

B.Tech – Artificial Intelligence and Machine Learning

2023 – 2027

Swami Vivekananda Institute of Technology, Hyderabad

CGPA: 7.0

Intermediate (TSBIE)

2021 – 2023

Narayana Junior College, Hyderabad

CGPA: 7.6

SSC

2021

SR Digi School, Hyderabad

CGPA: 10.0

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript
- **Machine Learning / AI:** OCR pipelines, LLM API integration (Gemini API), prompt design, basics of model evaluation
- **Frontend:** React, Tailwind CSS, HTML, CSS
- **Backend:** Node.js (Basics), Flask, REST APIs
- **Database:** MongoDB, Firebase
- **Tools:** Git, GitHub, Figma, Android Studio
- **Core CS:** Data Structures & Algorithms, OOP, SDLC

PROJECTS

HealthScan – AI Medication Reminder

Live | GitHub

- Built an OCR pipeline to extract medication names and dosage schedules from prescription images, tested across $[N]$ real prescription formats
- Designed a reminder scheduling engine that converts parsed prescription data into automated voice alerts, removing manual data entry
- Integrated text-to-speech for accessibility, supporting users with limited literacy or visual impairment
- Achieved $[X]\%$ parsing accuracy on a held-out test set of prescription images

MindEase AI - Mental Health

Live | GitHub

- Engineered a Flask backend wrapping the Gemini API with custom prompt design for emotion-aware, context-retentive responses
- Built a mood-detection layer that classifies user sentiment from text/voice input and adjusts response tone in real time
- Implemented bidirectional voice interaction (speech-to-text input, text-to-speech output) for natural, hands-free conversation

- Designed a breathing-therapy module that triggers guided animations based on detected emotional intensity thresholds

SupportMind – AI Customer Support Platform

Live | GitHub

- Developed an AI-powered customer support platform that analyzes complaints and generates personalized, context-aware resolutions instead of generic chatbot responses
- Implemented a memory-driven support system that stores prior customer interactions and uses historical complaint data to improve future responses
- Built a full-stack SaaS application with secure Google OAuth authentication, backend API integration, and database connectivity for persistent user and ticket management
- Designed and deployed a responsive dashboard for issue tracking, analytics, and support automation

BMW M3 E36 – Car Showcase Website

Live | GitHub

- Built a responsive showcase site with animated transitions and an interactive image gallery using React, Tailwind CSS, and Vite
- Designed reusable, prop-driven UI components to keep the codebase scalable across pages
- Optimized bundle size and load time using Vite's build pipeline, achieving a $[X]$ Lighthouse performance score

EXPERIENCE

Full Stack Web Developer Intern

Nov 2025 – Feb 2026

Amdox Technology (Remote)

- Built and shipped $[N]$ responsive web pages/features using HTML, CSS, JavaScript, and React for *[describe product/team]*
- Refactored UI into $[N]$ reusable React components, reducing duplicate code and speeding up new page development
- Collaborated with a team of $[N]$ developers using Git-based workflows, with code reviewed and merged via pull requests
- Wrote documented, tested code following team style guidelines, reducing review iterations on later PRs

ACHIEVEMENTS

- **Smart India Hackathon (SIH) Finalist** – 2023: reached the national finals out of $[N]$ teams, building *[one-line description of the problem/solution]*
- **Smart India Hackathon (SIH) Internal Winner** – 2025: won the institute-level selection round for *[problem statement]*

ADDITIONAL INFORMATION

Languages: English, Hindi, Telugu

Interests: Web Development, Problem Solving, Music
